Architectural Solutions  
Pvt Ltd

## Introduction :

Citadel Architectural Solution Pvt. Ltd. deals in specialized architectural products. Keeping with its trend of introducing novel architectural products in the Indian market, Citadel proudly presents "Belleza". Belleza is a world class acoustical and decorative wall and ceiling panel range that guarantees to add class and international style to your interiors.

In specialized areas where noise and echo free environment is required, Belleza is the exquisite solution. The designer panels can be laid very easily to solve the noise nuisance at the same time it enhances beauty by lending a very classic and elegant appearance to the interiors.

## Features :

Belleza panels consist of a finished surface, a base core board and black acoustic felt backing. The base core board is a 12mm or 18mm thick MDF sheet with a laminated finish to its front face and black acoustic felt adhered on its rear face.

The panels are manufactured with a tongue and groove joint ensuring a perfect finish on installation. The panels are exceptionally durable and abuse resistant making them particularly appropriate for areas that may require a high degree of impact resistance.

## Application :

Belleza panels are suitable for almost every application including Schools, Retail Malls, Offices, Theater, Restaurants, Studios, Auditoriums, Conference Rooms, Video Conferencing Rooms, Sports Complexes, Night Clubs, Casinos, Museums, Private Suites, Screening Rooms, Giant Screen Venues, Entertainment Events, Cruise Ship, Performing Arts Center, Visitor and Business Reception Centers and much more.....

## Installation :

With Belleza we pride ourselves in being able to fully understand and deliver complete customer solutions from survey, to design and installation. The installation process is very simple allowing large areas to be installed very quickly and with the minimum of fuss. It is also easily possible to renovate existing paneling walls with Belleza very quickly and without hindering the work environment.

## Acoustic Performance :

Belleza is an advanced and efficient sound absorbing product for reducing reverberant noise levels in many environments.

## Surface Finishes:

Belleza is available in a range of finishes and designs :

Natural wood veneers :- These acoustic panels are faced with natural wood veneers. Due to the natural characteristics of wood, wood veneer colors and grains are inconsistent and mismatched, hence giving it a more natural appeal.

Printed wood veneers :- These acoustic panels are faced with a printed laminate paper, which imitates natural wood.

Painted finish:- These acoustic panels are spray painted and can suit a variety of requirements.

## Face Patterns:

There are two standard face patterns. One pattern is made up of a series of slats and the other pattern is made up of a series of round holes. Other face patterns are available upon request. Each Panel has a machined tongue down one long edge and a machined groove down the other long edge. Each end is square edged.

## Fire Safety:

Standard panels meet Bs476 Class 3 fire rating. If special fire treatment is required, the real wood veneered panels can be treated with proprietary intumescent varnish.

## Weight:

Nominal panel weight:- 10kg/m<sup>2</sup>.

## Standard Nominal sizes:

| Length (mm) | Width (mm)  |                         |
|-------------|-------------|-------------------------|
| 2400        | 197/293/581 |                         |
| 1200        | 197/293/581 | Tolerances +/- 3mm      |
| 800         | 197/293/581 | Other sizes are         |
| 600         | 197/293/581 | available upon request. |

## Maintenance :

The Belleza panels are easy to maintain. The panels can be cleaned with non-abrasive cleaners, which are suitable for wood veneers.
